

### **Helpful Hints on Filling Out the Scholarship**

1. Answer each question on the application in complete sentences.
2. Look at each component in the question and address each one. Brag about yourself!
3. Be “creative” when filling out the application. Instead of saying “I supervise 5 employees” maybe say it differently, “I learned the value of hard work, team support, clear directions, multitasking and clear communication from a variety of perspectives while being trusted with rising levels of responsibility in leading a 5 person team”.
4. The obvious writing mechanics should not be ignored. Get someone else to proofread your application, or try reading it backwards to pick up any minor mistakes.
